ABSTRACT

This document presents data on the frequency with which senior high school industrial education teachers perform their professional tasks as reported by the teachers in a study during the 1971-72 academic year. Also presented are data which show the importance which these senior high school industrial education teachers attach to their professional tasks. The document contains seven tables and two appendixes. This study was part of a larger study of junior, junior-senior, senior, and capstone teachers of industrial education subjects in Wisconsin for the purpose of re-evaluating the B.S., M.S., and Fd.S. degree programs in industrial education at the University of Wisconsin-Stout. STATEMENT OF THE PROBLEM

In these pages is reported a study of the professional tasks of Wisconsin senior high school industrial education teachers.

More specifically, data are presented in response to two questions:

- With what frequency do Wisconsin senior high school industrial education teachers perform professional tasks?
- 2. What importance rating do Wisconsin senior high school industrial education teachers assign to professional tasks?

RELATION TO OTHER STUDIES

In August of 1972, a paper was prepared which reviewed the development of the task analysis studies at UW-Stout up to that point in time.

Since this study is based upon that development, the following outline of it is presented for information:

Introduction
Need for Role Descriptions
Program Development Model
Position Paper Implications
Identification of Tasks
Development of Task Analysis
Survey Instruments
Processing the Data

Lawrence S. Wright, <u>Development of Task Analysis Studies in Industrial Education</u>; Graduate College, University of Wisconsin-Stout, Menomonie, Wisconsin, August, 1972.

Also, in the summer of 1972, a study was completed by six graduate students at UW-Stout.² This paper examined the professional tasks of Wisconsin industrial arts teachers (1) who taught in any or all of grades 7, 8 and/or 9 whether they also taught in senior high school or not, (2) who taught in any or all of grades 10, 11 or 12 whether they also taught in junior high school or not, and (3) who taught Capstone industrial education courses.

In the belief that a more detailed study of those who taught only grades 7, 8 and/or 9; those who taught 7, 8 and/or 9 and 10, 11 and/or 12; those who taught 10, 11 and/or 12 but not Capstone courses; and those who taught Capstone courses without regard to other levels at which they might be teaching; this study was undertaken.

This study is Part IV in the following series:

Part I: Introduction to the Problem

Part II: Frequency and Importance of Their Professional Tasks as Reported by Wisconsin Junior High School Industrial Arts Teachers

Part III: Frequency and Importance of Their Professional Tasks as Reported by Wisconsin Junior-Senior High School Industrial Arts Teachers

Part IV: Frequency and Importance of Their Professional Tasks as Reported by Wisconsin Senior High School Industrial Education Teachers

Part V: Frequency and Importance of Their Professional Tasks as Reported by Wisconsin Capstone Industrial Education Teachers

DISTRIBUTION OF SENIOR HIGH SCHOOL INDUSTRIAL EDUCATION TEACHERS BY GRADE LEVEL

In the effort to learn at what grade level Wisconsin industrial education teacher-respondents were teaching, they were asked to respond to the following item:

"Check <u>each</u> of the levels in which you are teaching one or more industrial education subjects this year":

6th	grade	8th grade	10th grade	12th grade
7th	grade	9th grade	11th grade	Caps tone

Data presented in Table 1 are those related to the senior high school grades. It may be noted that 153 or 75 percent of the senior high school respondents reported teaching industrial education subjects in each of the grades 10, 11, and 12 during the 1971-72 school year.

TEACHING EXPERIENCE

Respondents were asked to indicate within categories the number of years of teaching experience including the current year (1971-72). Data presented in Table 2 show a fairly uniform distribution within the categories ranging from 30 or 15.3 percent with from 11 to 15 years to 55 or 28.1 percent with more than 15 years of experience.

FREQUENCY RATINGS

Data are presented in Appendix A which show the frequency rating assigned each first-level, second-level and third-level task as reported by those teaching industrial education subjects in the 10th, 11th and/or 12th grade levels in Wisconsin during the 1971-72 academic year. These ranks are assigned on the basis of the median value. The interquartile range is a measure of agreement among those responding.

It may be of interest to note the ranking by senior high school industrial arts teachers of the frequency with which they perform first-level tasks. (It may be recalled that these are cumulations of their responses to the third-level tasks.) These data are presented in Table 3.

IMPORTANCE RATINGS

Data are presented in Appendix B which show the importance rating assigned each first-level, second-level and third-level task as reported by those teaching industrial education subjects in the 10th, 11th and/or 12th grade levels in Wisconsin during the 1971-72 academic year. The ranks

TASKS RECEIVING LOW RATINGS

An examination was made of the tasks which received low ratings. Low ratings for frequency were those reported as "do not perform" by the median value of the respondents. Low ratings for importance were those reported as "unimportant" or as "slightly important" by the respondents. These tasks were identified in Table 7.

SUMMARY

Data has been presented which show the frequency with which Wisconsin senior high school industrial education teachers report that they perform their professional tasks.

Data has also been presented which show the importance which Wisconsin senior high school industrial education teachers attach to their professional tasks.

These data are part of a larger study of junior, junior-senior, senior high school and capstone teachers of industrial education subjects in Wisconsin for the purpose of re-evaluating the B.S., M.S., and Ed.S. degree programs in industrial education at UW-Stout.
